Paul Kahn's book is one of the deepest meditations on evil that I have read. It is insightful, rich, and original. Moshe Halbertal, Hebrew University of Jerusalem, in 'Out of Eden' Paul W. Kahn offers a philosophical meditation on the problem of evil. He uses the Genesis story of the Fall as the starting point for a profound articulation of the human condition. Kahn shows us that evil expresses the rage of a subject who knows both that he is an image of an infinite God and that he must die. Kahn's interpretation of Genesis leads him to inquiries into a variety of modern forms of evil, including slavery, torture, and genocide. Kahn takes issue with Hannah Arendt's theory of the banality of evil, arguing that her view is an instance of the modern world's lost capacity to speak of evil psychological, social, and political accounts.

do not explain evil as much as explain it away focusing on the existential roots of evil rather than on the occasions for its appearance kahn argues that evil originates in man s flight from death he urges us to see that the opposite of evil is not good but love while evil would master death love would transcend it offering a unique perspective that combines political and cultural theory law and philosophy kahn here continues his project of advancing a political theology of modernity this is no ordinary account of what is usually meant by the problem of evil instead paul w kahn s aim is to explore the nature of evil itself a rich and fascinating book full of unusual conjunctions and insights john habgood times literary supplement

t f torrance s proposal for natural theology constitutes one of the most creative and provocative elements in his work by re envisioning natural theology as the cognitive structure of theology determined by god s self revelation in jesus christ and not as the task of philosophically reflecting on the nature or existence of god aside from religious presuppositions torrance moves through and beyond barth s resistance to natural theology this book establishes torrance s unique reconstruction of natural theology within its proper intellectual context providing a fresh analysis of this important methodological innovation as it emerges from torrance s realist epistemology as irving demonstrates in torrance s distinctive conception of science he operated with an approach to cognition that functions via a realist synthesis of experience and understanding and in torrance s theological science this synthesis of experience and understanding is the synthesis of revealed theology and natural theology the author argues that this reconstruction of natural theology expresses a dramatic vision for human agency within theological cognition adding the necessity of the human knowing subject to the priority of the divine revealer finally this book marries torrance s accomplishments in reconstructing natural theology to his christocentric theological method in which god is both revealed and known in the person of jesus christ
