for more than half a century this book has been a fixture in architecture and construction firms the world over twice awarded the aia s citation for excellence in international architecture book publishing mechanical and electrical equipment for buildings is recognized for its comprehensiveness clarity of presentation and timely coverage of new design trends and technologies addressing mechanical and electrical systems for buildings of all sizes it provides design guidelines and detailed design procedures for each topic covered thoroughly updated to cover the latest technologies new and emerging design trends and relevant codes this latest edition features more than 2 200 illustrations 200 new to this edition and a companion website with additional resources

stage lighting design applications and more builds upon the information introduced in stage lighting the fundamentals to provide an in depth reference to a number of specialty areas of lighting design from traditional applications such as drama dance and designing for different venues to more advanced applications such as concert corporate film and video virtual architectural landscape and other forms of entertainment lighting each chapter gives the essential background design practices and equipment details for each specialization so readers can make informed decisions and ask informed questions when encountering each field the book provides insight on the latest technology and includes profiles of prolific designers such as james moody jeff ravitz alan adelman and paul gregory stage lighting design applications and more is intended to help lighting designers translate their theatrical skills to other areas of lighting design and provides guidance on how to take those initial steps into new ventures in their lighting careers

presents an organised comprehensive and easy to understand overview of the lighting design process it covers every topic from the nature of light itself through selecting the correct equipment to preparing project plans and the finished design documents

using a dummy example the student is taken through an entire project step by step where the full range of alternatives and design processes are illustrated the easy to read conversational tone makes the novice feel at home with complex technical concepts and provides an excellent introduction to all newcomers to the subject the book is ideal for those working in architecture electrical engineering and interior design who will one day design lighting systems for others to build a companion website runs alongside the book at litinterior.com supporting distance learning projects providing manufacturers data calculation engines and downloadable courses for carrying out design exercises the content of the courses will be linked directly to the book includes us codes and standards

achieving building comfort by natural means explores examples of green building designs and methods that are currently being used around the world to achieve human comfort in buildings the operation of buildings accounts for more than 40 of total energy use and is a major source of carbon emissions it is imperative that this consumption be substantially decreased and that energy needed for building comfort is obtained from renewable and environmentally friendly sources this book brings together a global group of contributors who look at factors such as location climate building materials energy management ventilation thermal environmental conditions shading lighting acoustics and more that are critical for achieving buildings that are more sustainable thermal comfort and climatic potential of ventilative cooling in temperate climates is available open access under a creative commons attribution 4.0 international license via link.springer.com

completely revised and updated evaluation of human work is a compendium of ergonomics methods and techniques that is both broad and deep the editors have once again brought together a team of world renowned experts and created a forum for them to introduce their most valued techniques and methods almost every chapter has been revised and several new chapters have been added see what's new in the third edition sociotechnical design of work systems team design and evaluation learning from failures through a joint cognitive systems perspective the analysis of organizational processes techniques in user centered design

increased understanding of the nature of knowledge and knowledge management in contemporary systems environment surveys systems for near miss reporting and analysis the one thing that has remained unchanged from the first and second editions is that this text is produced not as a cookbook of ergonomics methods the editor places ergonomics methodology in context and each chapter carefully describes the background to method development in that area and the application of methods and tools exploring the topic of ergonomics human factors from a doing it perspective the book serves as a guide to what ergonomics can offer industry business or human service professionals and a reference for practicing ergonomists

publisher description
